Code	Nomenclature of Subject	L	Т	Minor	Major	Tota	Time			
				Test	Test	I				
HM-25	55A Professional Practice, Law & Ethics	2	-	25	75	100	3 Hr			
Cours	<b>To make the students understand the types of roles they are</b>	e exj	pec	ted to play	in the soci	iety as				
Objec	ective practitioners of the civil engineeringprofession.									
Unit	Course Outcome									
Ι	To familiarise the students to what constitutes professional practice, introduction of various									
	stakeholders and their respective roles; understanding the fundamental ethics governing									
	theprofession				U	0				
II	To give a good insight into contracts and contracts managemen	t in	civ	il enginee	ring, disput	te				
	resolution mechanisms; laws governing engagement of labour $\Box$			-						
III	To give an understanding of Intellectual Property Rights, Patent	s.								
IV	To make the students understand the types of roles they are expected to play in the society									
	as practitioners of the civil engineeringprofession	-		- •		-				

Professional Practice – Respective roles of various stakeholders: Government (constituting regulatory bodies and standardization organizations, prescribing norms to ensure safety of the citizens); Standardization Bodies (ex. BIS, IRC)(formulating standards of practice); professional bodies (ex. Institution of Engineers(India), Indian Roads Congress, IIA/ COA, ECI, Local Bodies/ Planning Authorities) (certifying professionals and offering platforms for interaction); Clients/ owners (role governed by contracts); Developers (role governed by regulations such as RERA); Consultants (role governed by bodies such as CEAI); Contractors (role governed by contracts and regulatory Acts and Standards); Manufacturers/ Vendors/ Service agencies (role governed by contracts and regulatory Acts and Standards)

#### UNIT-II

Professional Ethics – Definition of Ethics, Professional Ethics, Business Ethics, Corporate Ethics, Engineering Ethics, Personal Ethics; Code of Ethics as defined in the website of Institution of Engineers (India); Profession, Professionalism, Professional Responsibility, Professional Ethics; Conflict of Interest, Gift Vs Bribery, Environmental breaches, Negligence, Deficiencies in state-of-the-art; Vigil Mechanism, Whistleblowing, protected disclosures.

#### **UNIT-III**

General Principles of Contracts Management: Indian Contract Act, 1972 and amendments covering General principles of contracting; Contract Formation & Law; Privacy of contract; Various types of contract and their features; Valid & Voidable Contracts; Prime and sub-contracts; Joint Ventures & Consortium; Complex contract terminology; Tenders, Request For Proposals, Bids & Proposals; Bid Evaluation; Contract Conditions & Specifications; Critical /" Red Flag" conditions; Contract award & Notice To Proceed; Variations & Changes in Contracts; Differing site conditions; Cost escalation; Delays, Suspensions & Terminations; Time extensions & Force Majeure; Delay Analysis; Liquidated damages & Penalties; Insurance & Taxation; Performance and Excusable Non-performance; Contract documentation; Contract Notices; Wrong practices in contracting (Bid shopping, Bid fixing, Cartels); Reverse auction; Case Studies; Build-Own-Operate & variations; Public- Private Partnerships; International Commercial Terms;

#### **UNIT-IV**

Engagement of Labour and Labour & other construction-related Laws: Role of Labour in Civil Engineering; Methods of engaging labour- on rolls, labour sub-contract, piecerate work; Industrial Disputes Act, 1947; Collective bargaining; Industrial Employment (Standing Orders) Act, 1946; Workmen's Compensation Act, 1923; Building & Other Construction Workers (regulation of employment and conditions of service) Act (1996) and Rules (1998); RERA Act 2017, NBC 2017

Code	Nomenaleture of Subject	T	т	Minon Tost	Moior Test	Total	Time			
Code	Nomenciature of Subject	L	I	Minor Test	Major Test	Total	Time			
CE-301A	STRUCTURAL ANALYSIS-II	2	1	25	75	100	3 Hr			
Course	Students will acquire the knowledge about	out t	he m	ethods of ana	lysis of differ	rent stru	ictures.			
Objective										
Unit	Course Outcome									
Ι	Students will be able to understand behavior in the form of S.F and B.M for continuous									
	beams by influence line method									
II	Students will be able to analyze the be	havi	or of	rolling load of	on structures	and fixe	ed			
	arches									
III	Students will be able to analyze the frames structures									
IV	Students will be able to drive methods for stiffness and flexibility.									
					-					

**Influence lines**:Introduction, influence lines for three hinged and two hinged arches, load position for Max. S.F.and B.M. at a section in the span.Influence Line for statically indeterminate Beams:Muller-Breslau Principle, I.L. for B.M. & S.F. for continuous Beams

#### UNIT-II

**Rolling Loads**: Introduction, Single concentrated load, uniformly distributed load longer than span, shorter than span, two point loads, several point loads, Max. B.M. and S.F. Absolute, Max. B.M.Fixed Arches: Expression for Horizontal Thrust and Bending Moment at a section, Elastic centre

## **UNIT-III**

**Kani's Method**: Analysis of continuous beams and simple frames, analysis of frames with different column lengths and end conditions of the bottom story.

#### **UNIT-IV**

**Approximate Analysis of frames**:(i) For vertical loads, (ii) for lateral loads by Portal method & Cantilever method.

Matrix MethodsIntroduction, Stiffness Coefficients, Flexibility Coefficients, development of flexibility & stiffness matrices for plane frame, Global axis and local axis, analysis of plane frame, pin jointed and rigid jointed.

**Paper Setter Note**: 8 questions of 15 marks each distributed in four sections are to be set taking two questions from each unit. The candidate is required to attempt five questions in all, taking at least one from each of the four sections.

#### **Books Recommended:**

1.Indeterminate structures, R.L.Jindal S.Chand & Co., N.Delhi.

2.Advanced Structural Analysis-A.K.Jain, NemChand & Bros., Roorkee.

3. Structural Analysis-A Unified Approach, D.S. Prakash Rao, University Press, Hyderabad.

4.Structural Analysis-A unified classical & Matrix Approach, A.Ghali & A.M.Neville, Chapman & Hall London.

5. Theory of Structures-Vol. I&II-S.P.Gupta & G.S.Pandit, Tata McGraw Hill, N.Delhi.

6.Basic Structural Analysis -C.S. Reddy, Tata McGraw Hill, New Delhi.

Code	Nomenclature of Subject	L	Т	Minor Test	Major Test	Total	Time				
CE-303A	DESIGN OF CONCRETE STRUCTURES-I	3	-	25	75	100	4 Hr				
Course	To learn about the design of different types of structu	res l	by ı	using reinfor	ced cement c	oncrete	•				
Objective	(RCC)										
Unit	Course Outcome										
Ι	Students will be able to gain knowledge of design philosophies of different methods for RCC										
	structures.										
II	Students will be able to design of RCC beams using	WOI	rkir	ng stress and	limit state m	ethod.					
III	Students will be able to design of RCC columns and	l foo	ting	g using work	ting stress and	d limit :	state				
	method.										
IV	Students will be able to design of RCC slab and reta	inin	g w	alls and deta	ailing of steel	using					
	working stress and										
	limit state method.										

# Elementary treatment of concrete technology:

Physical requirements of cement, aggregate, admixture and reinforcement, Strength and durability, shrinkage and creep. Design of concrete mixes, Acceptability criterion, I.S. Specifications,

# **Design Philosophies in Reinforced Concrete:**

Working stress and limit state methods, Limit state v/s working stress method, Building code, Normal distribution curve, characteristic strength and characteristics loads, design values, Partial safety factors and factored loads, stress -strain relationship for concrete and steel.

# UNIT-II

## Working Stress Method:

Basic assumptions, permissible stresses in concrete and steel, design of singly and doubly reinforced rectangular and flanged beams in flexure, steel beam theory, inverted flanged beams, design examples.

# Limit State Method:

Basic assumptions, Analysis and design of singly and doubly reinforced rectangular flanged beams, minimum and maximum reinforcement requirement, and design examples.

# **UNIT-III**

# Analysis and Design of Sections in shear bond and torsion:

Diagonal tension, shear reinforcement, development length, Anchorage and flexural bond, Torsional, stiffness, equivalent shear, Torsional reinforcement, Design examples.

# **Columns and Footings:**

Effective length, Minimum eccentricity, short columns under axial compression, Uniaxial and biaxial bending, slender columns, Isolated and wall footings, Design examples.

# Serviceability Limit State:

Control of deflection, cracking, slenderness and vibrations, deflection and moment relationship for limiting values of span to depth, limit state of crack width, Designexamples.

#### UNIT-IV

# **Concrete Reinforcement and Detailing:**

Requirements of good detailing cover to reinforcement, spacing of reinforcement, reinforcement splicing, Anchoring reinforcing bars in flexure and shear, curtailment of reinforcement.

# One way and Two Ways Slabs:

General considerations, Design of one way and two ways slabs for distributed and concentrated loads, Nonrectangular slabs, openings in slabs, Design examples.

# **Retaining Walls:**

Classification, Forces on retaining walls, design criteria, stability requirements, Proportioning of cantilever retaining walls, counterfort retaining walls, criteria for design of counterforts, design examples.

**Paper Setter Note**: 8 questions of 15 marks each distributed in four sections are to be set taking two questions from each unit. The candidate is required to attempt five questions in all, taking at least one from each of the four sections. **Time Duration: 4 Hours.** 

## **Books:**

- 1. Design of Reinforced Concrete Structures, P.Dayaratnam, Oxford & IBHPub., N.Delhi.
- 2. Reinforced Concrete-Limit State Design, A.K.Jain, Nem Chand &Bros., Roorkee.
- 3. Reinforced Concrete, I.C.Syal & A,K,Goel, A.H,Wheeler & Co.Delhi.
- 4. Reinforced Concrfete Design, S.N.Sinha, TMHPub., N.Delhi.
- 5. SP-16(S&T)-1980, 'Design Aids for Reinforced Concrete to IS:456, BIS,N.Delhi.
- 6. SP-34(S&T)-1987 'Handbook on Concrete Reinforcement and Detailing', BIS,N.Delhi.
- 7. Reinforced Concrete Design Pillai and Menon, TMH, NewDelhi.

Code	Nomenclature of Subject	L	Т	Minor Test	Major Test	Total	Time		
CE-305A	HYDROLOGY	2	-	25	75	100	3Hr		
Course	Hydrology is the scientific study o	f the n	novem	ent, distributio	n, and quality	of water	on		
Objective	Earth and other planets, including	the wa	ater cyc	ele, water resou	urces and envir	onment	al		
Ū	watershed sustainability.								
UNIT	Course Outcome								
Ι	Students will be able to get better knowledge about the total precipitation in the particular area								
	using different rain gauges								
II	Students will be able to measure the	he eva	poratic	n, transpiration	n and infiltration	on and c	an analyze		
	the measured data.								
III	Students will be able to calculate t	the tot	al runo	ff and able to c	iraw hydrograj	ohs for th	he		
	different durations of rainfall and	can pr	edict th	ne future runof	f.				
IV	Students will be able to get the knowledge of ground water, its quality and efficiency of the								
	ground storage.								

# Introduction:

Hydrologic cycle, scope and application of hydrology to engineering problems, drainage basins and its characteristics, stream geometry, hypsometric curves.

# **Precipitation:**

Forms and types of precipitation, characteristics of precipitation in India, measurement of Precipitation, recording and non-recording rain gauges, rain gauge station, rain gauge network, estimation of missing data, presentation of rainfall data, mean precipitation, depth

-area –duration relationship, frequency of point rainfall, intensity-duration- frequency curves, probable max. precipitation.

# UNIT-II

# **Evaporation & Transpiration:**

Process, evaporimeters and empirical relationships, analytical method, reservoir evaporation and methods of its control, transpiration, evapotranspiration and its measurement, Penman's equation and potential evapotranspiration.

# Infiltration:

Infiltration process, initial loss, infiltration capacity and measurement of infiltration, infiltration indices.

# **UNIT-III**

# **Runoff:**

Factor affecting run-off, estimation of runoff, rainfall-run off relationships, measurement of stage-staff gauge, wire gauge, automatic stage recorder and stage hydrograph, measurement of velocity-current meters, floats, area velocity method, moving boat and slope area method, electromagnetic, ultra-sonic and dilution methods of stream flow measurement, stage discharge relationship.

# **Floods and Flood Routing:**

Flood frequency studies, recurrence interval, Gumbel's Method, flood routing, reservoir flood routing, channel flood routing and flood plain mapping.

# Hydrograph:

Discharge hydrograph, components and factors affecting shape of hydrograph, effective rainfall, unit hydrograph and its derivation, unit hydrograph of different durations, use and limitations of UH, triangular UH, Snyder's synthetic UH, floods, rational methods, empiricalformulae.

# UNIT-IV

# **Ground Water:**

Occurrence, types of aquifers, compressibility of aquifers, water table and its effects on fluctuations, wells and springs, movement of ground water, Darcy's law, permeability and its determination, porosity, specific yield and specific retention, storage coefficient, transmissibility.

# Ground Water Quality:

Indian and International standards, pollution of ground water and possible source, remedial and preventive measures.

**Paper Setter Note**: 8 questions of 15 marks each distributed in four sections are to be set taking two questions from each unit. The candidate is required to attempt five questions in all, taking at least one from each of the four sections.

# Books:

- Engineering Hydrology by K.Subramanya, TMH, NewDelhi
   Hydrology by H.M.Raghunath.
- 3. Hydrology for Engineers by Linsely, Kohler, Paulhus.4. Elementary Hydrology by V.P.Singh.

Code	Nomenclature of Subject	L	Т	Minor Test	Major Test	Total	Time			
CE-307A	Geotechnical Engineering	3	-	25	75	100	3 Hr			
Course	The subject gives a better idea about t	he soi	l and i	ts properties	& also design	of types	of			
Objective	e foundation.									
UNIT	Course Outcome									
Ι	Students will be able to get better knowledge the sub-surface soil and its properties and									
	methods of sampling and testing.									
II	Students will be able to analyse and	Desig	gn the	different typ	pes of shallow	v foundat	ion.			
III	Students will be able to analyse and	Desig	gn the	different typ	pes of pile for	undation.				
IV	Students will be able to analyse and Design the different types of Drilled Piers and Caisson									
	Foundations.									

**Sub-Surface Exploration:** Purpose, stages in soil exploration, depth and lateral extent of exploration, guidelines for various types of structures, ground water observations, excavation and boring methods, soil sampling and disturbance, major types of samplers, sounding methods-SCPT, DCPT, SPT & interpretation, geo-physical methods, pressure-meter test, exploration logs. **Drainage & Dewatering:** Introduction, ditches and sumps, well point systems, shallow well system, deep well drainage, vacuum method, Electro-osmosis, consolidation by sand piles, Eductor method.

#### **UNIT-II**

**Shallow Foundations-I:** Design criteria for structural safety of foundation (i) location of footing, (ii) shear failure criterion, (iii) settlement criterion, ultimate bearing capacity, modes of shear failure, Rankine's analysis Tergazi's theory, Skempton's formula, effect of fluctuation of G.W.T., effect of eccentricity on bearing capacity, I.S Code recommendations, factors affecting bearing capacity, methods of improving bearing capacity.

**Shallow Foundations-II:** Various causes of settlement of foundation, allowable bearing pressure based on settlement, settlement calculation, elastic and consolidation settlement, allowable settlement according to

I.S.Code. Plate load test and its interpretation, bearing capacity from penetration tests, design bearing capacity. **Shallow Foundations-III:** Situation suitable for the shallow foundations, types of shallow foundations and their relative merits, depth of foundation, footing on slopes, uplift of footings, conventional procedure of proportioning of footings, combined footings, raft foundations, bearing capacity of raft in sands and clays, various methods of designing rafts, floating foundations.

#### UNIT-III

**Pile Foundations-I:** Introduction, necessity of pile foundations, classification of piles, load capacity, static analysis, analysis of pile capacity in sands and clays, dynamic analysis, pile load tests, negative skin friction, batter piles, lateral load capacity, uplift capacity of single pile, under-reamed pile.

**Pile Foundations-II:** Group action in piles, pile spacing, pile group capacity, stress on lower strata, settlement analysis, design of pile caps, negative skin friction of pile group, uplift resistance of pile group, lateral resistance, batter pile group.

#### UNIT-IV

**Drilled Piers and Caisson Foundations:** Drilled piers-types, uses, bearing capacity, settlement, construction procedure. Caissons-Types, bearing capacity and settlement, construction procedure. well foundations-shapes, depth of well foundations, components, factors affecting well foundation design lateral stability, construction procedure, sinking of wells, rectification of tilts and shifts, recommended values of tilts & shifts as per I.S.3955.

**Paper Setter Note**: 8 questions of 15 marks each distributed in four sections are to be set taking two questions from each unit. The candidate is required to attempt five questions in all, taking at least one from each of the four sections.

#### **Books Recommended:**

Analysis and Design of Foundation and Retaining Structures by S. Prakash, Gopal Ranjan & S.Saran, SaritaPrakashan.
 Analysis and Design of Sub Structures by Swami Saran, IBHOxford

- 3. Basic and Applied Soil Mechanics by Gopal Ranjan and ASR Rao, NewageInt.Pub.
- 4. Soil Dynamic by Shamsher Prakash, McGrawHill

5. Foundation Design by Teng, PrenticeHall6. Soil Mechanics & Foundation Engineering by Bharat Singh, Shamsher Prakash, Nem Chand & Bros, Roorkee.

7. Soil Mechanics and Foundation Engineering by AlamSingh.

Code	Nomenclature of Subject	L	Т	Minor Test	Major Test	Total	Time					
CE-309A	CONCRETE TECHNOLOGY	2	-	25	75	100	3 Hr					
Course	To have better understanding about	t the v	ario	us properties	of materials an	d ingre	dients					
Objective	of concrete.	of concrete.										
UNIT	Course Outcome											
Ι	Students will be able to gain knowledge of the construction materials like Cement &											
	Aggregates and its properties											
II	Students will be able to design con	crete	and	perform test	on concrete on	various						
	strength parameters, modifying its	prope	rties	using other	substances.							
III	Students will be able to examine v	arious	effe	ects on concre	ete & its non-de	estructi	ve tests					
	for properties evaluation.											
IV	Students will be able to gain knowledge about methods of repairing and design of											
	special concrete.	-			- •	•						

**Introduction:** Introduction of Concrete, preparation of concrete, grades of concrete, advantages of concrete, concept of quality control.

**Cement:** Introduction of Cement, ingredient in cement. basic chemistry, types of cement, ordinary Portland cement, rapid hardening cement, low heat cement, sulphate resistant cement, Portland-pozzolona cement, high strength Portland cement, high alumina cement, waterproof cement, white Portland cement, hydrophobic cement, colored Portland cement, Field and laboratory tests on cement. Pozzolanic materials, Fly ash, metakaoline, GGBS, iron slag, rise husk ash - its types, properties, applications &limitations.

**Aggregates:** Aggregates, classification of aggregates based on petrography, size, shape and textures, deleterious substances in aggregates, bulking of fine aggregates, sieve analysis, grading of aggregates as per IS-383-1970, fineness modulus, Maximum size of aggregate, Quality of mixing water, curing water.

#### UNIT-II

.**Production of Concrete:** Introduction, Design of mix by IS & ACI methods including batching of materials, mixing of concrete materials, transportation of concrete, compaction of concrete, ready mixed concrete, vibrators, Internal vibrators, external vibrators, concrete curing and formwork removal.

**Properties of Concrete:** Introduction, workability, factors influencing workability, measurement of workability, requirements of workability, properties of hardened concrete, stress and strain characteristics of concrete, Young's modulus of concrete, creep and shrinkage of concrete, permeability of concrete, durability of concrete sulphate attack, fire-resistance, thermal properties of concrete, construction joints, expansion and contraction joints.

# UNIT-III

**Non-Destructive Testing of Concrete:** Significance of Non-Destructive Testing, Rebound Hammer, Ultrasonic pulse velocity techniques, Penetration techniques, pullout tests, vibration methods, radioactive techniques, Cover meter, core-tests.

**Deterioration of Concrete & its Prevention:** Causes of concrete deterioration, deterioration by water, surface weir, frost action, deterioration by chemical reactions, sulphate attack, alkali-aggregate reaction, corrosion of embedded steel in concrete, Prevention of deterioration ofconcrete.

#### UNIT-IV

**Repair Technology for Concrete Structures:** Symptoms and diagnosis of distress, evaluation of cracks, repair of cracks, common types of repairs, distress in fire damaged structures, underwater repairs.

**Special Concrete:** Light weight concrete, definition and its properties, applications, high strength concrete, definitions, its properties and applications, Mass Concrete, waste material based concrete, shortcrete, fiber reinforced concrete: Materials Fibres types and properties, ferrocement, polymer concrete composites, heavy weight concrete for radiation shielding.

**Prestressed Concrete**: Introduction, basic concepts, classifications and types of prestressing, prestressing systems, and properties of materials, pre tensioned and post tensioned concrete elements.

**Paper Setter Note**: 8 questions of 15 marks each distributed in four sections are to be set taking two questions from each unit. The candidate is required to attempt five questions in all, taking at least one from each of the four sections. **TEXT BOOKS**

<b>CE-315LA</b>	Geotechnical Engineering Lab	2	60	40	100	<b>2H</b>
Course Objective	The subject gives better idea about the soil an indesign	d its prop	perties whi	ich are vei	y uset	ful
	of types of foundation.					

# LIST OF EXPERIMENTS

- 1. Grain Size Analysis-Hydrometermethod.
- 2. Shrinkage LimitDetermination.
- 3. Relative Density of GranularSoils.
- 4. Consolidated Drained (CD) TriaxialTest.
- 5. Consolidated Undrained (CU) Triaxial Test with Pore Water Pressuremeasurement.
- 6. ConsolidationTest.
- 7. UndisturbedSampling.
- 8. Standard PenetrationTest.
- 9. Dynamic Cone PenetrationTest.
- 10. Model Plate LoadTest.

# **Books:**

- 1. Soil Testing for Engineers by S.Prakash & P.K.Jain, Nem Chand &Bros., Roorkee.
- 2. Engineering Soil Testing by Lambi, Wiley-Eastern.
- 3. Engineering Properties of Soils & Their Measurement by JE Bowles, McGraw-Hill.
- 4. Soi l Engineer ing in Theory & Pract ice by Alam Singh, Vol. II, Geotechnical Testing & Instrumentation, CBSPub.

CE-302A	DESIGN OF STEEL STRUCTURES-II	3	-	25	75	100	3 Hr			
Course	To Impart knowledge and ability to design	vario	ous s	teel struc	tures.					
Objective										
UNIT	Course Outcome									
Ι	Students will be able to familiar with the E	leme	entar	y Plastic	Analysis	and Desig	gn of			
	steel structures.									
II	Students will be able to design steel water	tank	and	steel stac	ks and th	eir stabilit	y			
	checks.									
III	Students will be able to design steel towers and Cold Formed Sections and their									
	stability checks.									
IV	Students will be able to design steel industr	rial b	ouild	ing and t	neir stabi	lity checks	s.			

## **Elementary Plastic Analysis and Design:**

Introduction, Scope of plastic analysis, ultimate load carrying capacity of tension members and compression members, flexural members, shape factor, mechanisms, plastic collapse, analysis, plastic analysis applied to steel beams and simple portal frames and design.

# UNIT-II

# **Design of Water Tanks:**

Introduction, permissible stresses, design of circular, rectangular and pressed steel tanks including staging. **Design of Steel Stacks:** 

Introduction, various loads to be considered for the design of steel stacks, design of steel stacks including foundation.

## UNIT-III

# **Towers:**

Tmicrowave towers, Design loads, classification, design procedure and specification.

#### **Cold Formed Sections:**

Introduction and brief description of various types of cold formed sections, local buckling, concepts of effective width and effective sections, elements with stiffeners, design of compression and bending elements.

#### **UNIT-IV**

# **Industrial Buildings:**

Loads, general arrangement and stability, design considerations, design of purlins, design of roof trusses, industrial building frames, bracings and steppedcolumns.

**Paper Setter Note**: 8 questions of 15 marks each distributed in four sections are to be set taking two questions from each unit. The candidate is required to attempt five questions in all, taking at least one from each of the four sections.

# **Books:**

1. Design of Steel Structures, A.S.Arya & J.L.Ajmani, Nem Chand & Bros., Roorkee.

2. Design of Steel Structures, P.Dayartnam, Wheeler Pub.Allahabad.

3. Design of Steel Structures, Gaylord & Gaylord, MGH, Newyork/International StudentsEd.

4. IS:800-1984, Indian Standard Code of Practice for General Construction inSteel.

5. IS-801-1975, Indian Standard Code of Practice for Use of Cold formed light gauge steel structural members in general buildingconstruction.

Code	Nomenclature of Subject	L	Т	Minor Test	Major Test	Total	Time				
CE-304A	TRANSPORTATION ENGINEERING	3	-	25	75	100	3 Hr				
Course Objective	The study of safe & optimum geometric design highway materials.	geometric design of highways & fundamental parameters of									
UNIT	Course Outcome										
Ι	Students will able to gain knowledgeabout of their concern authorities.	Students will able to gain knowledgeabout the history review of roads and development of their concern authorities.									
Π	Students will be able to examine geometric highways.	c des	sign	n and their	cross section	al eleme	nts of				
III	Students will gain knowledge about regulation and safe movements of the traffic.										
IV	Students will gain knowledge about different fundamental parameters of highway materials.										

**Introduction**: Transportation and its importance. Different modes of transportation. Brief review of history of road development in India and abroad: Roman, Tresagne, Telford and Macadam constructions. Road patterns. Classification of roads, Objectives of highway planning, Planning surveys. Saturation system of planning.

**Traffic Characteristics and Traffic Surveys:** Road user and vehicular characteristics. Traffic studies such as volume, speed and O & D study. Parking and accident studies. Fundamental diagram of traffic flow. Level of service. PCU. Capacity for non-urban roads. Causes and preventive measures for road accidents.

**Traffic Control Devices:** Traffic control devices: signs, signals, markings and islands. Types of signs. Types of signals. Design of an isolated fixed time signal by IRC method.

#### UNIT-II

## **Design of Flexible Pavements:**

Types of pavements. Flexible and rigid pavements. Components of a pavement and their functions. Factors affecting design of pavements. Design of thickness of a flexible pavement by Group Index method, CBR method (including latest IRC guidelines), riaxial method and Burmister's method.

# **Design Of Rigid Pavements:**

Westergaard's theory, critical locations of loading, load and temperature stresses. Critical combination of stresses. IRC guidelines for determination of thickness of a rigid pavement. Joints: requirements, types, patterns. Spacing of expansion and contraction joints. Functions of dowel and tie bars.

# UNIT-III

**Cross Section Elements and Sight Distance Considerations:** Cross section elements: friction, carriageway, formation width, land width, camber, IRC recommended values. Types of terrain Design speed. Sight distance, stopping sight distance, overtaking sight distance, overtaking zones, intermediate sight distance, sight distance at intersections, head light sight distance, set back distance. Critical locations for sight distance

**Design of Horizontal and Vertical Alignment**: Effects of centrifugal force. Design of super-elevation. Providing super- elevation in the field. Radius of circular curves. Extra-widening. Type and length of transition curves. Gradient, types, values. Summit curves and valley curves, their design criterion. Grade compensation on curves.

#### UNIT-IV

**Bituminous Materials and Bituminous Mixes:** Types of bituminous materials: bitumen, tar, cutback and emulsions. Various tests, testing procedures and IRS/IS specifications for suitability of bituminous materials in road construction. Bituminous mix, desirable properties. Marshall' method of mix design. Basic concept of use of polymers and rubber modified bitumen in bituminous mixes.

## **Construction of Bituminous Pavements:**

Various types of bituminous constructions. Prime coat, tack coat, seal coat and surface dressing. Construction of BUSG, Premix carpet, BM, DBM and AC. Brief coverage of machinery for costruction of bituminous roads: bitumen boiler, sprayer, pressure distributer, hot-mix plant, cold-mix plant, tipper trucks, mechanical paver or finisher, rollers. Mastic asphalt. Introduction to various IRC and MOST specifications.

**Paper Setter Note**: 8 questions of 15 marks each distributed in four sections are to be set taking two questions from each unit. The candidate is required to attempt five questions in all, taking at least one from each of the four sections.

# **Books:**

- 1. Highway Engg. by S.K.Khanna & C.E.G.Justo, Nem Chand &Bros,Roorkee.
- 2. Principles of Transportation and Highway Engg. by G.V.Rao, Tata McGraw Hill Pub., N.Delhi.
- 3. Traffic Engg. And Transport Planning by L.R.Kadiyali,KhannaPub.Delhi.
- 4. Traffic Engg. by Matson, T.M., Smith, W.S. and Hurd, P.W.McGraw Hill Book Co., NewYork.

Code	Nomenclature of Subject	L	Т	Minor Test	Major Test	Total	Time		
CE-306A	IRRIGATIONENGINEERING	2	-	25	75	100	2 Hr		
Course Objective	The student is exposed to different phases in irrigation practices and Planning and management of irrigation. Further they will be imparted required knowledge on Irrigation storage and distribution canal system and Irrigationmanagement.								
UNIT	Course Outcome								
Ι	Students will be able to understand the	e met	hods	and managem	ent ofirrigation	n			
II	Students will be able to gain knowledge on types of Impounding structures								
III	Students will be able understand methods of irrigation including canalirrigation.								
IV	Students will be able understand water r	nanag	gemei	nt on optimizatio	on of wateruse.				

**CROP WATER REQUIREMENT**Need and classification of irrigation- historical development and merits and demerits of irrigation- types of crops-crop season-duty, delta and base period- consumptive use of crops-estimation of Evapotranspiration using experimental and theoretical methods

#### **UNIT-II**

**IRRIGATION METHODS** Tank irrigation – Well irrigation – Irrigation methods: Surface and Sub-Surface and MicroIrrigation design of drip and sprinkler irrigation – ridge and furrow irrigation-Irrigation scheduling – Water distribution system- Irrigationefficiencies.

#### UNIT-III

**DIVERSION ANDIMPOUNDINGSTRUCTURES** Types of Impounding structures - Gravity dam – Forces on a dam -Design of Gravity dams; Earth dams, Arch dams- Diversion Head works - Weirs and Barrages-**CANAL IRRIGATION** Canal regulations – direct sluice - Canal drop – Cross drainage works-Canal outlets – Design of prismatic canal-canal alignments-Canal lining - Kennedy's and Lacey's Regime theory-Design of unlined canal

#### UNIT-IV

**WATER MANAGEMENTINIRRIGATION** Modernization techniques- Rehabilitation – Optimization of water use-Minimizing water losses- On form development works-Participatory irrigation management-Water resources associations- Changing paradigms in water management-Performance evaluation-Economic aspects of irrigation

#### TEXTBOOKS:

- 1. Dilip Kumar Majumdar, "Irrigation Water Management", Prentice-Hall of India, New Delhi, 2008.
- 2. Punmia B.C., et. al; Irrigation and water power Engineering, Laxmi Publications, 16th Edition, New Delhi, 2009
- **3.** Garg S. K., "Irrigation Engineering and Hydraulic structures", Khanna Publishers, 23<sup>rd</sup> Revised Edition, New Delhi, 2009

Code	Nomenclature of Subject	L	Т	Minor Test	Major Test	Total	Time	
OE- 308A	Soft Skills and Interpersonal Communication	3	-	25	75	100	3 Hr	
UNIT	Course Outcome			<u> </u>				
Ι	Develop basic understanding of Communication							
II	Understand the process of communication and spea	king						
III	Develop the Personality concepts and its implementation							
IV	Develop the basic of Group Discussion and intervie	WS						

Communication: Introduction Verbal, Non-Verbal, kinesics, proxemics, chronemics, Types of communication, extrapersonal communication, intrapersonal communication, intrapersonal communication, mass communication, Creativity in communication, Role of communication, flow of Communication and its need, Persuasive communication and negotiation;Time management in Persuasive communication, Importance of Persuasive Communication

# UNIT-II

Barriers in the way of communication, noise, intrapersonal barriers, interpersonal barriers, organizational barriers, Extrapersonal barriers, Basics of communication:importance of communication, process of communication, objectives and characteristics of communication, Communication skills: Accent, Intonation, Phonetics, Speaking skills, Confidence, clarity, Fluency, Quality, pronunciation

#### **UNIT-III**

Personality Development; what is personality? Role of personality, Heredity, Environment, situation, Basics of personality, Soft skills; Needs and training, Activity in soft skills, Organizational skill;Introduction and its need, basics principles for Organization skills,Stress management;Introduction, Stress at home and office, Stress prevention, analyze the model of stress.

## UNIT-IV

Group discussion, form of Group discussion, strategy for Group discussion, discussing problems and solution, Oral presentation, introduction, planning, Occasion, Purpose, Modes of delivery, Resume making;Purpose of Resume, Resume design and structure, contents in Resume, types of resume, Job interview, introduction, objective of Interview, types of interview, stages of interview,Face to face interview and campus interview **Text Books:** 

**1.**Technical Communication Principles and Practice by Meenakshi Raman and Sangeeta Sharma by Oxford Publication

#### **Reference Books:**

1. Personality Development and soft skills by Barun K. Mitra, OxfordPublication

2. Communication Skills ForEngineers by C.Muralikrishna and Sunita Mishra, PearsonPub.

Note: The paper setter will set the paper as per the question paper templates provided.

Code	Nomenclature of Subject	L	Т	Minor Test	Major Test	Total	Time		
OE-310A	Introduction to art and aesthetics	3	-	25	75	100	3 Hr		
Course objective	The course will examine the role and development of the visual arts in past and present cultures throughout the world.								
UNIT	Course Outcome								
Ι	To help students to develop art application, aestheti	c ju	dgn	nent					
II	To increase visual perception and critical thinking s	kill	S						
III	To gain the knowledge of architecture.								
IV	To know the different styles in Interior design and f	urn	iture	e design					

#### Unit-I

Movement in Art in the 18th and 19th Century. Neoclassicism - Romanticism - Impressionism - Monet and contemporary artists - Post Impressionism - Van Gogh and contemporaries.

Movements in art in the 20th Century. Fauvism – Cubism – Picasso – Braque - Expressionism - Futurism – Dadaism - Duchamp - Surrealism - Dali - Abstract Expressionism – Pollock - Warhol - Constructivism - De Stijl - Bauhaus School and Gropius - Conceptual Art - Site Specific Art- Op Art – Neo-Expressionism.

#### Unit-II

Rajasthani Architecture - Islamic Architecture : Tajmahal, Charminar, Golgumbaz, Fatehpur Sikri -Colonial Architecture in India at Lucknow, Patna, Kolkota. – Painting schools in Medieval India – Malwa, Deccan and Jodhpur Schools – Mughal and Rajput Painting – Mysore and Tanjore Paintings – Kangra, Madhubani and Pattachitra Styles.

Art & Architecture in Kerala – Traditional Architecture – Traditional Wood Carvings and Mural Paintings.

#### **Unit-III**

Indian Art in 19<sup>th</sup> and 20<sup>th</sup> Centuries. European influence in Indian Art, Company School, Raja Ravi Varma -Realistic academic painting & sculpture. Revivalist movement - Bengal school - Abanidranath Tagore – Nandalal Bose – Ramkinker Baij – Jamini Roy – Amrutha Shergil - Post – Independent developments in Indian Art: Progressive art Movements – Kolkata, Mumbai, Chennai - Souza – Hussain – Ara - Raza – Madras School: KCS Panicker and followers.

#### **Unit-IV**

Different styles in Interior Design and Furniture Design: Egyptian, Rococo, Art Deco, Bauhaus, Modernism and Post Modernism, Minimalism, Eclecticism, High tech & hard edge style – Eastern influences.

#### **Text Books:**

1.Indian Art : Parthe Mitter 6. Indian Art: A Concise History : Roy C Craven

#### REFERENCE

The Story of Art : E. H. Gombrich
 A People's History of the World : Chris Harman
 Gardner's Art Through the Ages: The Western Perspective : Fred S. Kleiner

OE- 312A	Human Resource Management and	3	-	25	75	100	3 Hr			
	organizational behaviour									
UNIT	Course Outcome									
Ι	Develop basic understanding Human Res	ource	Man	agement						
II	Understand the process of Human resource	ce trai	ning	and developn	nent					
III	Develop the Leadership quality									
IV	Develop the concept of formal and inform	nal or	ganiz	ational behav	viour					

HRD-Macro Perspective: HRD Concept, Origin and Need, HRD as a Total System; Approaches to HRD, Human Development and HRD, HRD at Macro and Micro Climate.

HRD–Micro Perspective: Areas of HRD, HRD Interventions Performance Appraisal, Potential Appraisal, Feedback and Performance Coaching, Training, Career Planning, OD or Systems Development, Rewards, Employee Welfare and Quality of Work Life and Human Resource Information, Staffing for HRD, Roles of HR Developer, Physical and Financial Resources for HRD, HR Accounting, HRD Audit, Strategic HRD

# UNIT-II

Instructional Technology for HRD : Learning and HRD, Models and Curriculum, Principles of Learning, Group and Individual Learning, Transactional Analysis, Assessment Centre, Behaviour Modeling and Self Directed Learning, Evaluating the HRD

Human Resource Training and Development : Concept and Importance, Assessing Training Needs, Designing and Evaluating T&D Programmes, Role, Responsibilities and challenges to Training Managers.

Training Methods: Training with in Industry (TWI): On the Job & Off the Job Training, Management Development: Lecture Method, Role Play, Simulation, Globalization challenges and Strategies of Training Program, Review on T&D Programmes in India.

# UNIT-III

Motivation: Types of Motives, Theories of Maslow, Herzberg, McGregor, Alderfers, Porter and Lawler's Model; Job Enlargement, Job Enrichment, Behaviour Modification. Leadership : Concept, Leader Vs. Manager; Classical Studies on Leadership, Trait Theories, Behavioral Theories, Group and Exchange Theories; Contingency Theory of Leadership, Leadership Styles.

# UNIT-IV

Formal and Informal Organisations: Orgin of Formal and Informal Organisations, Problems Associated with Informal Organisations.

Organisational Effectiveness (OE) : Concept; Approaches to O E, Adoptive Coping Cycle for Effectiveness; Achieving OE, Organisational Climate: Concept, Determinants of Organisational Climate, Physical Environment; Values and Norms

Organization Theory: Classical Theory; Neo-Classical Theory, Modern Behavioural Theories, contingency theory, system theory, modern structural models, Organizational Culture, Creating and Sustaining Culture, Work Culture

Code	Nomenclature of Subject	L	Т	Int.	Ext.	Total	Time				
EL-322A	Structural Dynamics	2	-	25	75	100	3 Hr				
Course Objective	To understand the behaviour of dynamic loading the behaviour of structures. Understand the co- earthquake resistant.	To understand the behaviour of dynamic loading. Study the effect of earthquake loading on the behaviour of structures. Understand the codal provisions to design the structures as earthquake resistant.									
UNIT	Course Outcome										
Ι	Students will be trained to identify, formulate an	d solv	e con	nplicated	i problem.						
II	Students will be able to understand the role of na	atural c	alam	ity in th	e damage o	f structure	es.				
III	Students will be able to develop the skill to analyse data and to apply the same in the practical problems.										
IV	Students will be able to apply the developed met structures	hodolo	ogies	for the s	safe and sta	ble design	n of				

#### UNIT-I

Introduction: Objective, difference between static and dynamic analysis, loading, essential characteristics of a dynamic problem, principles of dynamics, formulation of equation of motion.

#### UNIT-II

Single Degree Of Freedom System: analysis for free and forced vibration, Duhamels integral, Damping — types and evaluation, Response of SDOF system to harmonic excitation, Periodic excitation, Impulsive loading, arbitrary, step, pulse excitation, Response to General Dynamic loading, Numerical evaluation of dynamic response-superposition and step by step methods, generalized SDOF system.

#### UNIT-III

Multi degree of freedom: equation of motion, equation of structural property matrices, problem statement and solution methods, free vibration, forced harmonic vibration, damped motion for MDOF, Generalized co-ordinates, principle of orthogonality of modes,

#### UNIT-IV

Multi degree of freedom:Eigenvalue problem, model response, approximate methods: Stodalla-Vanaello, Modified Reyleigh's method, Holzer's Method, Holzer Myklested method, Matrix method, Energy method, Lagrange's equation, model analysis, stochastic response of linier SDOF and MDOF system to Gaussian inputs.

Code	Nomenclature of Subject	L	Т	Int.	Ext.	Total	Time		
EL-324A	Solid and hazardous waste management	2	-	25	75	100	3 Hr		
UNIT	Course Outcome								
Ι	Examine physical and chemical composition	Examine physical and chemical composition of hazardous wastes.							
II	Analyze activities associated with the manage	ement	of so	olid wa	ste.				
III	Understand method to recover materials, con	serve	prod	ucts, an	d to gene	erate ener	gy from		
	solid and hazardous wastes								
IV	Design and locate waste containment systems as per regulatory standards.								

Introduction, sources & types of solid waste; Municipal solid waste: composition & its quantity of generated Municipal solid waste; Industrial solid waste: classification & extent of generation of waste in India.

Physical, Chemical, and Biological characteristics of Municipal Solid waste; Impact of solid waste on environment

#### UNIT-2

Collection: Collection of Solid waste; collection policy, collection system, equipments, factors affecting collection, analysis of collection system, collection routes

Transfer and Transport: Need for transfer operation, transfer stations, types, transport means and methods, location of transport stations, Transfer stations: selection of location, types & design requirements, operation & maintenance.

# UNIT-3

Physicochemical Treatment of Solid and Hazardous Waste: Combustion, stabilization and solidification of hazardous wastes, soil vapour extraction, air stripping

Biological Treatment of Solid and Hazardous Waste: Composting; bioreactors; anaerobic decomposition of solid waste; principles of biodegradation of toxic waste; slurry phase bioreactor; in-situ remediation; Landfill design for solid and hazardous wastes; leachate collection and removal; landfill covers; incineration

#### UNIT-4

Hazardous solid waste: Introduction; biomedical waste Management: Biomedical waste and their impacts on health and environment; legislative laws on management; labeling and storage of biomedical waste; transportation and disposal methods

Radioactive Waste Management: Fundamentals Sources, measures and health effects; nuclear power plants and fuel production; waste generation from nuclear power plants; disposal options References:

					Test			
EL-326A	ENGINEERING GEOLOGY	2	-	25	75	100	2 Hr	
Course	At the end of this course the students will be able to underst	and t	the ir	nportance of	geological	knowled	lge	
Objecti	such as earth, earthquake, volcanism and to apply this knowledge in projects such as dams, tunnels,							
ve	bridges, roads, airport and harbor.		-					
UNIT	Course Outcome							
Ι	Will be able to understand the importance of geological know	vledg	ge suc	ch as earth, ea	rthquake, v	volcanisi	m and	
	the action of various geologicalagencies.							
II	Will get basics knowledge on properties of minerals.							
III	Gain knowledge about types of rocks, their distribution and u	ses.						
IV	Will understand the methods of study on geologicalstructure.							

# Introduction:

Definition, object, scope and sub division of geology, The interior of the earth, crust, mantle and core, Importance of geology in Civil Engineering projects. Different branches of geology.

# **Physical Geology:**

Origin of earth, external and internal geological forces causing changes, erosion of the surface of the earth.Geological work of ice, water and wind, Soil profile and its importance ,Earth movement, earthquakes and volcanoes.

## UNIT-II

# **Mineralogy and Petrology:**

Definition of mineral and rocks, Classification of minerals, physical and chemical properties of minerals. Classification of rocks. Mineral composition, Textures, structure and origin of Igneous, Sedimentary and Metamorphic rocks.

# Structural Geology and general stratigraphy of India:

Elementary idea about outcrop, dip and strike, bedding plane, fold, fault, joint and unconformity. General principles of stratigraphy of India and their characteristics

#### UNIT-III

# **Geological Investigations:**

Preliminary geological investigations- Use of geological maps and interpretation of data, geological reports, hydrogeology, water table, springs and artesian well, ground water in engineering projects, artificial recharge of ground water, Elementary ideas of geological investigation, Remotesensing techniques for geological and hydrological survey and investigation.

## Geological conditions and stability of foundation sites and abutments:

Geological condition and their influence on the selection, location, type and design of dams, reservoirs, tunnels, highways, bridges. Geological definitions and aspects of landslides and Hill-slope stability.

# UNIT-IV

#### **Improvement of foundation rocks:**

Precaution and treatment against faults, joints and ground water (electrical and seismic methods). Retaining walls and other treatments.

#### Geology and environment of earth.

Engineering geology and its case study, water table, geology as a subject, flood plane deposits, deltas, waterfalls, lakes etc.Earth environment, global warming and effect.

Note: The physical study of rock samples and minerals may be performed in the tutorials.

**Paper Setter's Note:** 8 questions of 15 marks each distributed in four sections are to be set taking two from eachunit. The candidate is required to attempt five questions in all, taking at least one from each of the foursections.

EL-328A	GROUND WATER	2	-	25	75	100	2 Hr		
Course	o introduce the student to the principles of Groundwater governing Equations and Characteristics of								
Objective	ifferent aquifers, To understand the techniques of development and management of groundwater								
UNIT	Course Outcome								
Ι	Understand aquifer properties and itsdynamics								
II	Get an exposure towards well design and practicalproblem	ns							
III	Develop a model for groundwatermanagement.								
IV	Students will be able to understand the importance of artif	ficia	l re	charge and gr	oundwater				
	qualityconcepts								

Properties of Aquifers, Formation constants, compressibility of aquifers, Equation of motion for steady and unsteady ground water flow in isotropic homogeneous aquifers, Dupit's assumptions. Unconfined flow with a recharge, tile drain problem. Ground water exploration and methods of investigations.

#### **UNIT-II**

Effect of Boundaries, interference of water, leaky aquifers, Thiem's equilibrium formula for unconfined and confined aquifers and determination of hydraulic properties of aquifers. Partial penetration of an aquifer by a well, spherical flow in a well. Non equilibrium formula for aquifer (unsteady radial flows).

## UNIT-III

Tubewells, optimum capacity, silting of tubewell, design of Tubewells in different aquifers, tubewell types, parts, bore hole, strains, its types, well pipe, causing pipe, blind pipe. Construction and working of tubewells, site selection, drilling operation, cable tool method, hydraulic method, rivers Rotary Method and drilling fluids, well screen assembly installation, verticality and alignment of tubewells, gravel packing, development of tubewells, sickness, in construction and corrosion and failure of tubewells, Pumping equipment and hydraulic testing of pumps.

#### UNIT-IV

Artificial Recharge of Ground Water, considerations and methods, recharge techniques induced infiltration, water spreading, flooding, basins, ditching, modification of natural channels, irrigation, recharge pits, shafts and recharge wells.

#### **Books:**

Groundwater Hydrology, D.K. Todd, John Wiley & Songs Inc. New York. Groundwater H.M. Raghunath, Wiley Eastern Ltd., N.Delhi.

Code	Nomenclature of Subject	L	Т	Minor	Major	Total	Tim
				Test	Test		e
EL-330A	Repair and rehabilitation of structure	2	-	25	75	100	2 Hr
Course	To acquire the knowledge on Quality of concrete, durability aspects, causes of deterioration,						
Objective	assessment of distressed structures, repairing of structures and demolition procedures.						
UNIT	Course Outcome						
Ι	The importance of maintenance and assessment meth	od o	of di	stressedstruc	ctures.		
II	The strength and durability properties, their effects due to climate and temperature.						
III	Recent development inconcrete the techniques for repair rand protectionmethods						
IV	Repair, rehabilitation and retrofitting of structures and demolitionmethods.						

#### UNIT-I

Maintenance and repair strategies: Maintenance, repair and rehabilitation, Facets of Maintenance, importance of Maintenance various aspects of Inspection, Assessment procedure for evaluating a damaged structure, causes of distress and deterioration of concrete- Evaluation of existing buildings through field investigations, Seismic evaluation ot existing buildings

Serviceability and durability of concrete: Quality assurance for concrete construction concrete properties - strength, permeability, thermal properties and cracking. - Effects due to climate, temperature, chemicals, corrosion — design and construction errors - Effects of cover thickness and cracking.

#### UNIT-II

Materials and techniques for repair: Special concretes and mortar, , concrete chemicals, special elements for accelerated strength gain, Expansive cement, polymer concrete, sulphur infiltrated concrete, ferro cement, Fibre reinforced concrete. Rust eliminators and polymers coating for rebars during repair, foamed concrete, mortar and dry pack, vacutlm concrete, Gunite and Shotcrete, Epoxy injection, Mortar repair for cracks, shoring and underpinning - Methods of corrosion protection, inhibitors, corrosion resistant steels, coating and cathodic protection.

#### **UNIT-III**

Repairs, rehabilitation and retrofitting of structures: Repairs to overcome low member strength, Deflection, Cracking, Chemical disruption, weathering corrosion, wear, fire, leakage and marine exposure - Special techniques for structural Retrofitting (Bracing, Shear walls, Base isolation etc).

#### **UNIT-IV**

Demolition techniques: Engineered demolition techniques for Dllapidated structures — case studies - Case Studies on Restoration of fire damaged buildings, Case study on repairs and strengthening corrosion damaged buildings; Case study on use of composite fibre wraps for strengthening of building components.

EL-332A	CONSTRUCTION ENGINEERING &	2	-	25	75	100	2 Hr
	MANAGEMENT						
Course	To make the students to learn about planning	of	const	ruction proje	ects, scheduling pro	ocedures an	d
Objective	techniques, cost and quality control projects	and	l use	of project i	nformation as deci	sion makin	g
_	tool.						-
UNIT	Course Outcome						
Ι	Understand basic concepts of construction pla	ning	. Sch	edule the co	nstruction activities		
II	Forecast and control the cost in a construction.						
III	Understand the quality control and safety during construction.						
IV	Organize information in Centralized database Management systems.						

**CONSTRUCTION PLANNING** Basic concepts in the development of construction plans-Choice of Technology and Construction method-Defining Work Tasks- Work breakdown structure- Definition-Precedence relationships among activities-Estimating Activity Durations-Estimating Resource Requirements for work activities-coding systems.

SCHEDULING PROCEDURESAND TECHNIQUES Relevance of construction schedules-Bar charts - The critical path method-Calculations for critical path scheduling-Activity float and schedules-Presenting project schedules-Critical path scheduling for Activity-on-node and with leads, Lags and Windows-Calculations for scheduling with leads, lags and windows-Resource oriented scheduling-Scheduling with resource constraints and precedences -Use of Advanced Scheduling Techniques-Scheduling with uncertain durations- Crashing and time/cost tradeoffs -Improving the Scheduling process – Introduction to application software.

# UNIT-II

**COST CONTROL MONITORINGANDACCOUNTING** The cost control problem-The project budget-Forecasting for Activity cost control - financial accounting systems and cost accounts-Control of project cash flows-Schedule control-Schedule and Budget updates-Relating cost and schedule information.

#### UNITIII

**QUALITY CONTROL AND SAFETYDURINGCONSTRUCTION** Quality and safety Concerns in Construction-Organizing for Quality and Safety-Work and Material Specifications-Total Quality control-Quality control by statistical methods -Statistical Quality control with Sampling by Attributes-Statistical Quality control by Sampling and Variables-Safety.

#### UNIT IV

**ORGANIZATION AND USE OFPROJECTINFORMATION** Types of project information-Accuracy and Use of Information-Computerized organization and use of Information - Organizing information in databases-relational model of Data bases-Other conceptual Models of Databases-Centralized database Management systems-Databases and application programs-Information transfer and Flow.

# **TEXTBOOKS:**

- Chitkara, K.K. "Construction Project Management Planning", Scheduling and Control, Tata McGraw Hill Publishing Co., New Delhi,2009
- 2. Srinath,L.S., "Pert and CPM Principles and Applications", Affiliated East West Press, 2001

## **REFERENCES:**

EL-334A	Structure Analysis by matrix	2	-	25	75	100	2 Hr	
	method							
Course Objective : The analysis of structure by matrix method								
UNIT	Course Outcome	Course Outcome						
Ι	Students will be able to famili	ar wit	h Stif	fness and f	lexibility me	thod.		
II	Students will be able to famili	Students will be able to familiar with Elementary approach of matrix.						
III	Students will be able to familiar with Stability analysis of structure.							
IV	Students will be able to familiar with Plastic analysis of beams and frames.							

**Stiffness Method (Systems Approach):** Basis of stiffness method, Degrees of freedom, Force-displacement relationships, Nodalstiffness.

**Flexibility Method (Systems Approach):** Flexibility coefficients, Basis of the method, Application to various types ofstructures.

#### UNIT-II

**IntroductiontoElementApproach:**Memberstiffnessmatrix,LocalorMember co-ordinate system, Global or Structural co-ordinate system, Rotation of axes etc, Structure stiffnessmatrix.

## UNIT-III

**Structural Stability Analysis:** Elastic Instability, Introduction to stability problem, Energy methods, buckling of axially loaded members for different end conditions, Concept of effective length, approximate techniques, Stability analysis of beam-column andframes.

# UNIT-IV

**Plastic Analysis:** Concept of Limit load analysis, Upper and lower bonds. Plastic analysis of beams and multi-storey frames using mechanismmethod.

Non Linear Analysis: Introduction to geometric and materialnon-linearity.

# **Books recommended:**

- 1. Przemieniecki, J.S., 'Theory of Matrix Structure Analysis', Tata McGraw, Hill Book Co.
- 2. Martin, H.C. ' Introduction to Matrix Methods of StructuralAnalysis'McGraw Hill Book Co.

Code	Nomenclature of Subject	L	Т	Minor Test	Major Test	Total	Time
EL-336A	Disaster preparedness & planning	2	-	25	75	100	2 Hr

**Course Objective :** To Impart knowledge Disaster management and design & planning about to control the accidents.

acciacints.	
UNIT	Course Outcome
Ι	Students will be able to gain knowledge about Disaster and their types.
II	Students will be able to examine about the assessment of disaster and management of its control.
III	Students will be able to understand the building structures and their efficiency to control hazard.
IV	Students will be able to gain knowledge about the efficient structures and analysis of Hazard by case study.

UNIT-I

**Introduction to Disaster Management**: Define and describe disaster, hazard, emergency, vulnerability, risk and disastermanagement; Identify and describe the types of natural and non-natural disasters. Important phases of Disaster Management Cycle.

**Disaster Mitigation and Preparedness:** Natural Hazards: causes, distribution pattern, consequences and mitigation

measures for earth quake, tsunami, cyclone, flood, landslide drought etc. Man-made hazards: causes, consequences mitigation measures for various industrial hazards/disasters, Preparedness for natural disasters in urban areas.

# UNIT-II

Hazard and Risk Assessment: Assessment of capacity, vulnerability and risk, vulnerability and risk mapping, stages indisaster recovery and associated problems.

**Emergency Management Systems (EMS):** Emergency medical and essential public health services, response and recovery operations, reconstruction and rehabilitation.

# UNIT-III

**Capacity Building:** Gender sensitive disaster management approach and inculcate new skills and sharpen existing skills of government officials, voluntary activists, development of professional and elected representative for effective disaster management, role of media in effective disaster management, overview of disaster management in India, role of agencies like NDMA, SDMA and other International agencies, organizational structure, role of insurance sector, DM act and NDMA guidelines..

**Application of Geo-informatics and Advanced Techniques:** Use of Remote Sensing Systems (RSS) and GIS indisaster Management, role of knowledge based expert systems in hazard scenario, using risks-time charts to plan for the future, early warning systems.

# UNIT-IV

**Integration of public policy**: Planning and design of infrastructure for disaster management, Community based approachin disaster management, methods for effective dissemination of information, ecological and sustainable development models for disaster management.

**Case Studies:** Lessons and experiences from various important disasters with specific reference to Civil Engineering.

**Paper Setter Note**: 8 questions of 15 marks each distributed in four sections are to be set taking two questions from eachunit. The candidate is required to attempt five questions in all, taking at least one from each of the four sections.

# **Books/References:**

1. Natural Hazards in the Urban Habitat by Iyengar, C.B.R.I., Tata McGraw Hill. Pub

- 2. Natural Disaster management, Jon Ingleton (Ed), Published by Tudor Rose, Leicester
- 3. Disaster Management, R.B. Singh (Ed), Rawat Publications
- 4. ESCAP: Asian and the Pacific Report on Natural Hazards and Natural Disaster Reduction.

# Test on Aggregate/soil

Code	Nomenclature of Practical	Р	Major Test	Minor Test	Total	Time
CE-310LA	TRANSPORTATION ENGINEERING (P)	2	60	40	100	2Hr
Course Objective	The aim of study is to determine the different materials.	propertie	s of high	iway con	structio	n

- 1. To determine the toughness of the aggregate by Impact Test.
- 2. To determine the hardness of the aggregate by Los-Angeles Abrasion Test, Dorry's Abrasion test and Deval Attrition test on aggregates
- 3. To determine the Crushing Strength Test of Aggregates.
- 4. Flakiness and Elongation Index of aggregates.
- 5. Proportioning of aggregates.
- 6. Stripping test on aggregates.
- 7. Specific gravity and water absorption test on aggregates.
- 8. CBR lab test on soil.

# Test on Bitumen

- 1. To determine the grade and hardness of the bitumen by Penetration Test.
- 2. To determine the elastic property of the bitumen by Ductility Test.
- 3. To determine the grade and hardness of the bitumen by Viscosity Test.
- 4. To determine the Softening Point Test on Bitumen.
- 5. To determine the Flash and Fire Point Test on Bitumen.
- 6. Determination of bitumen content.
- 7. Specific gravity and water absorption test of bitumen.
- 8. Marshall's stability test.

Code	Nomenclature of Practical	Р	Major Test	Minor Test	Total	Time
CE-312LA	ENVIRONMENTAL ENGINEERING-I (P)	2	60	40	100	2H
Course Objective	To Impart knowledge of quality and mineral of	composi	tion of di	rinking w	ater sup	oply.

# LIST OF EXPERIMENTS

- 1. To determine the pH value of a given sample of water wastewater.
- 2. To determine the turbidity in given water waste watersample.
- 3. To determine the acidity of given sample of water wastewater.
- 4. To determine the alkalinity of given sample of water wastewater.
- 5. To determine temporary and permanent hardness in a given watersample.
- 6. To determine the chlorine does required for a given watersample.
- 7. To determine total suspended, suspended, dissolved settable solids in a sewagesample.
- 8. To determine the chloride concentration in a given sample of wastewater.
- 9. To determine the sulphate concentration in given watersample.

Code	Nomenclature of Practical	Р	Major Test	Minor Test	Tota l	Tim e
CE-314LA	Irrigation Engg. Design &Drawing	2	60	40	100	<b>3H</b>
Course	To Impart knowledge of irrigation structures					
Objective						

# **Complete design and drawing of the following:**

1. Design of weirs and barrages on permeable foundation for surface and sub surface flow conditions. 2. Design of Guide Banks.

- 3. Flood Routing using step by step method.
- 4. Design of Syphon Aqueduct.
- 5. Design of Sarda type fall & sloping glacis fall.
- 6. Seepage line in a homogeneous earth dams on impermeable foundation with horizontal drainage.
- 7. Design of Ogee Spillway and stilling basin.

Note: Emphasis would be given to the computer aided designs of some of above structures.

Code	Nomenclature of Subject	L	Т	Minor Test	Major Test	Total	Time	
MC-	Constitution of India	2	-	25	75	100	3 Hr	
902A								
Course	Course Objective : To know the basic features of Constitution of India							
UNIT	Course Outcome							
Ι	The students will be able to know about	ut sal	ient f	eatures of the	e Constitution of	of		
	India.							
II	To know about fundamental duties and federal structure of Constitution of India.							
III	To know about emergency provisions in Constitution of India.							
IV	To know about fundamental rights under constitution of India.							

Meaning of the constitution law and constitutionalism, Historical perspective of the Constitution of India. Salient features and characteristics of the Constitution ofIndia.

Scheme of the fundamentalrights

#### UNIT -II

The scheme of the Fundamental Duties and its legal status. The Directive Principles of State Policy – Its importance and implementation. Federal structure and distribution of legislative and financial powers between the Union and theStates.

Parliamentary Form of Government in India – The constitution powers and status of the President ofIndia

# UNIT - III

Amendment of the Constitutional Powers and Procedure. The historical perspectives of the constitutional amendments inIndia.

Emergency Provisions: National Emergency, President Rule, Financial Emergency. Local Self Government – Constitutional Scheme inIndia.

# **UNIT-IV**

Scheme of the Fundamental Right to Equality. Scheme of the Fundamental Right to certain Freedom under Article19.Scope of the Right to Life and Personal Liberty under Article21.

# **Text Books**

- 1. Constitution of India. Prof.Narender Kumar (2008) 8<sup>th</sup>edition. Allahabad LawAgency. **ReferenceBooks:**
- The constitution of India. P.M. Bakshi (2016) 15<sup>th</sup>Edition. Universal lawPublishing.
   Note: The paper setter will set the paper as per the question paper templates provided.
